ABOUT ME

Software Development Engineer (MERN) with a strong foundation in data structures and problem-solving, and hands-on experience building scalable, production-ready web applications. Founder and Lead Developer of Smart Krishi, an agriculture-tech platform pre-incubated at IIT Delhi. Lead Developer at Floyd School of Technology, architecting secure APIs, AI integration, and payment systems for a multi-portal ed-tech platform. Focused on system design and delivering impactful, industry-ready solutions.

TECHNICAL SKILLS

- **Frontend**: React.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Bootstrap
- **Backend**: Node.js, Express.js, REST APIs
- **Database**: MongoDB, SQL
- **Authentication & Security**: JWT, OAuth, Role-Based Access Control
- **Tools & Platforms**: Git, GitHub, Postman, Vercel, Render, Firebase

PROFESSIONAL EXPERIENCE

Software Developer — Floyd School of Technology

- Boosted student engagement by ~25% by centralizing digital learning and classroom workflows.
- Digitized end-to-end classroom operations, eliminating manual tracking across students, batches, and sessions.
- Enabled mentors to independently manage attendance and live sessions for 500+ students, cutting manual coordination.

PROJECTS

Floyd School LMS (www.floydschool.in)

Full Stack MERN Ed-Tech Platform

- Architected a multi-portal learning ecosystem (Student, Mentor, Admin) with JWT-based role access control, replacing fragmented manual enrollment and classroom management
- Integrated Razorpay for secure payments and Socket.IO for real-time classroom communication and live sessions
- Built an AI-powered feature to enhance the student learning experience
- Developed a centralized admin dashboard for managing students, batches, mentors, and course activity
- Designed scalable MERN architecture and REST APIs, supporting 500+ concurrent users

Smart Krishi — AI + IoT Agriculture Platform (Pre-incubated at IIT Delhi)

Project Resources: https://drive.google.com/drive/folders/1FBXlIYlyKzErJLGw7y2PMXkswN663k4B?usp=sharing

- Built the web/app platform connecting real-time field data, AI-driven recommendations, and automated irrigation controls for farmers
- Developed backend APIs and data pipelines to integrate sensor data and ML model outputs (crop recommendation, fertilizer guidance, irrigation triggers) into a usable farmer-facing interface
- Designed the frontend/dashboard experience for farmers to view crop health insights, recommendations, and irrigation status in real time

ACHEIVEMENTS

- 15+ national and international hackathon wins and top placements, including 1st Place at competitions hosted by IIT Delhi, Maharaja Agrasen Institute of Technology (MAIT Delhi), GDG IILM University, and other leading institutions nationwide.
- Finalist, Startup Clinic at BECon'26, IIT Delhi; selected for the Incubator Summit at IIT Delhi. Founded and developed Smart Krishi, which was pre-incubated at IIT Delhi.
- Finalist, YUVA AI in the IndiaAI ecosystem and India AI Summit.

LEADERSHIP

Google Student Ambassador — Gemini Program (GSA 2026)

- Campus representative driving Gemini awareness and engagement among students

Founder, Catalyst Room

- Built and led a 700+ member technology community spanning AI, IoT, and cybersecurity.

Secretary, Bit Brain Club (ABESIT)

- Led AI, robotics, and software initiatives; mentored members on project architecture, collaboration, and problem-solving.

EDUCATION

ABES Institute of Technology — **2023 - 2027**
B.Tech in Computer Science & Engineering (Data Science) | CGPA: 7.1

ST.Thomas School — **2021 - 2023**
Class 12th (CBSE) | Percentage: 76%

ST.Thomas School
Class 10th (CBSE) | Percentage: 78.5%
